Portfolio: brysonreyes.dev | LinkedIn: linkedin.com/in/bryson-reyes | GitHub: github.com/bryreyes

SUMMARY

CS new grad with hands-on experience in cloud infrastructure, backend services, and full-stack web development. Built computer vision tooling for academic research, deployed containerized ML inference on GKE, and shipped production web apps with live API integrations.

EDUCATION

B.S. Computer Science — California State University, San Marcos *May 2026*

GPA: 3.96/4.0

- Relevant coursework: Cloud Computing, Data Structures & Algorithms, Software Engineering, Intro to AI, Operating Systems, Networking, Database Management Systems

A.S. Mathematics — Palomar College, San Marcos *August 2023*

PROJECTS

LLM Cloud Deployment & Cost Benchmarking *GCP, GKE, k6, Docker, Git, Python*

- Deployed DeepSeek-R1-Distill-Qwen-1.5B as a CPU-only containerized inference service on GKE, benchmarked across multiple instance types (e2-standard-4, e2-standard-8, c3-standard-4)
- Built a telemetry and load-testing tool to measure throughput, p50/p95 latency, and cost per 1,000 tokens
- Evaluated Horizontal Pod Autoscaling behavior under simulated 3x burst traffic to quantify performance tradeoffs

Automated Motion Tracking System *Python, OpenCV, NumPy, Pandas, Tkinter*

- Built a computer vision application in a 4-person team to automate behavioral analysis of fruit flies for genetics obesity research, replacing manual observation methods used by the research team
- Implemented object detection and centroid tracking via adaptive thresholding and contour detection, extracting motion metrics (distance, velocity, active duration) with pixel-to-centimeter calibration
- Developed a GUI enabling non-technical researchers to upload videos, view real-time feedback, and export results
- Collaborated with a faculty research sponsor using agile methodology with weekly sprints

Spotify Playlist Commit Graph *React, Vite, Tailwind CSS, Spotify API, Vercel*

- Built a web app that visualizes Spotify playlist activity as GitHub-style contribution heatmaps, displaying track additions over time with per-user attribution
- Implemented OAuth 2.0 PKCE authentication flow and integrated the Spotify Web API
- Designed client-side architecture with API response caching to minimize infrastructure costs while maintaining read-only, privacy-conscious data access

SKILLS

Languages: Python, C/C++, Java, JavaScript, SQL

Frameworks/Libraries: React, OpenCV, NumPy, Pandas, Tailwind CSS

Tools: Git, Docker, GCP, Kubernetes, Vercel

Concepts: REST APIs, OAuth 2.0, Computer Vision, CI/CD

EXPERIENCE

Order Processor — Valley Radiology Consultants Medical Group, Poway, CA *July 2023 – Present*

- Processed and validated high volumes of patient order data with a strong focus on accuracy and consistency
- Coordinated with multiple departments to resolve order issues and ensure timely completion
- Maintained compliance with healthcare privacy and security requirements while handling confidential patient information
